

K Technologies is an ISO standard company, designing and manufacturing electronic automation product and LED lights for a decade. Our core focus is on energy conservation products. Especially our Automatic streetlight timer switch design has been satisfied maximum customers through its simplified excellence design. All of our products ensure simplified access of wide range of operators and end user. Now we proudly introduce our climatic based automatic street light timer switch. It delivers stress free operation with pre programmed intelligent software. It will operate the load accurately on account of the climatic condition of installed area.

## VINE Climatic streetlight Timer Switch

### Features

1. Microcontroller based design guarantees reliable operation.
2. Pre programmed operation keeps you stress free initial setup and turns ON/OFF the load as per your Area climate condition.
3. Plug & play installation.
4. LCD display for monitoring.
5. Powder coated cabinet.
6. Load MCB protects the circuit from short circuit.
7. Real Time Clock with auto correction and battery backup.
8. Drives up to 8000watts lighting load.
9. AUTO/MANUAL facility to test the load at daytime.
10. Load ON indication.

## Specification of ASTRO timer

Watts	Up to 8000watts maximum
Load	Lighting load
Operation	High quality power relay based
Design	Climatic based software design
Technology	Microcontroller
Load mcb	32Amps
Dimension	14 X 6.5X 6 inches
Fitting	Suitable for up to 14 inch pole
Fixture	Powder coated metal sheet
Colour	Double colour grey
Wiring	6sqmm
Manual operation	provided
